Leadership for the 21st Century

Jimmy Blackmon

Jimmy Blackmon has led soldiers for over 30 years, culminating as a Brigade Commander in the famed 101st Airborne Division, where he led over 3,500 of America's sons and daughters in Afghanistan. Jimmy is oft quoted as saying, "No matter how technologically advanced we become, life is and always will be about people and relationships. In this presentation, Jimmy shows the power of inspiration that only comes when leaders genuinely connect with those they lead. Management is about systems and processes. Leadership is about inspiring human beings. Both are vitally important to the success of any organization. Through practical examination, Jimmy demonstrates the necessity of both. In his formative years, Jimmy was told that leadership is lonely business, but he never bought into that idea. "If you're lonely you're not leading," he says. "You're mountain climbing." A leader that does not connect with those they lead will be followed half-heartedly because of position and title. An inspiring leader that develops genuine relationships with those they lead will be followed because they inspire human accomplishment. Are your employees compliant or committed? Jimmy will show you how to achieve commitment.

About Your Conference Hosts

About WRCIC: The Western Region Captive Insurance Conference, LLC (WRCIC) is a Limited Liability Corporation linking the Arizona, Missouri and Utah captive insurance associations together to jointly host an annual industry conference. The WRCIC, formed in 2017, consists of 2 board members from each state association whose sole purpose is to provide a quality annual industry conference. It is their vision to continue to grow this conference to attract additional state domiciles and become THE premier Captive Insurance conference in the West.

About UCIA: The Utah Captive Insurance Association is a not-for-profit Association. The Association seeks to promote all alternative market mechanisms and services both in the United States and internationally and to increase the visibility of Utah as a center and domicile for alternative risk financing entities, activities and facilities.

The objective of the Association is to provide information and education to Association members and others interested in the concept of alternative risk financing for existing risks not adequately served by the commercial insurance industry.

According to the provisions of the Utah Insurance Code, and understanding the authority granted under the Utah Captive Law, it is clear that the regulation of captives in Utah will permit the organization and operation of captive entities and alternative risk transfer options, and will provide a business-like common sense approach to any and all parties requesting approval of a formal facility to manage the risks of business owners, individually or as a group. The flexibility and responsiveness of the Utah Captive regulators will be friendly and thorough after reasonable and professional considerations. **www.utahcaptive.com**

About MOCIA: represents the captive insurance companies domiciled in Missouri, the service providers supporting the MO captive industry, and those parties wishing to learn more about the captive concept. Our goal is to serve as the center for information distribution, education and networking for all parties interested in the Missouri captive insurance industry.

We formed the association in 2010 through a nucleus of persons and firms already highly involved in and experienced with the captive marketplace. When Missouri legislation was passed authorizing domestication in our great state, we recognized the need to partner with the Missouri Captive Department to promote and support this new state law.

We welcome all involved parties in joining us to advance the benefits and advantages of captives. We can help businesses reduce costs while creating jobs and revenue for Missouri citizens. Missouri promises to maintain a progressive attitude toward the formation, licensing, and regulation of captive companies. Mandated requirements are minimal and each application is treated individually. Our association will work with interested parties, affiliated service suppliers and regulators to assure the efficiency of formation and the ease of maintenance for all Missouri captives.

Missouri has continued to enhance its original captive legislation. Currently, 6 different types of captive structures are allowed. Also the ease of re-domesticating your captive to MO has been improved. Missouri ranks in the top 5 worldwide domiciles in total captive premium written annually. And the average captive premium size is #1 for all domiciles. **www.mocaptive.com**

About AzCIA: The mission of the Arizona Captive Insurance Association (AZCIA) is to support, promote, foster and market Arizona as an attractive and competitive captive insurance domicile by providing education and networking opportunities for those who operate within the captive insurance industry.

To this end, the AzCIA has consistently maintained a viable relationship with the Department of Insurance in Arizona. We assist with growth promoting legislation and provide marketing resources as needed for the domicile. In addition, the Association is actively engaged in communications about changes in our industry including those that affect the various types and sizes of captives forming nationwide and their respective regulation.

For those who want to be a part of this evolving process, engage others in your profession, and shape the future of the captive industry in Arizona, the AZCIA is for you. **www.azcia.org**
